Front-end developer specializing in React, Next.js, and TypeScript, with a background in UI/UX design, building interfaces that are fast, accessible, and consistent from design through production.

Experience

Freelance — Front-end Developer & UI/UX Designer

Present

- Designing and building a client website independently using Astro, Sanity CMS, and TypeScript, incorporating GSAP animations and integrating the Resend and Asana APIs to automate form submissions and route them into a shared Asana board for tracking.
- Delivered a responsive landing page for a real estate client as part of a small team, on a paid basis.

Web Development Intern — Elinnov Technologies Inc.

Jun 2024 — Aug 2024

- Maintained and updated frontend content across live production websites using WordPress and Adobe Experience Manager, working within established CMS workflows in a professional team environment.

Projects

[Phainon](#) — Multiplayer TCG (TypeScript, Discord.js, Supabase)

Sep 2025 — Present

- Designed and developed a full-stack Discord card collection game featuring a player-run marketplace, gacha mechanics, and seasonal events, currently in active closed beta testing.
- Resolved concurrent race conditions in card issuance by using PostgreSQL row-level locking within atomic server-side RPCs and by migrating critical game logic into database transactions, eliminating duplicate issuance under concurrent player load.

[Triagent](#) — AI Doctor Recommender Chatbot (Flask, Gemini API)

Jun 2024 — Sep 2025

- Designed and built the frontend for a mobile-first AI health application using Figma and React, refining 40+ screens across five rounds of usability testing with 70+ participants.
- Nominated for Most Outstanding Thesis, DLSU College of Computer Studies.

[Arche](#) — Campus Social Connectivity App (React Native, Google Maps API)

Oct 2024 — Dec 2024

- Implemented real-time map integration in React Native using Expo and the Google Maps API, handling live coordinate tracking, pin updates, and location data persistence through Supabase.

[Influx](#) — E-Commerce Buy & Sell Platform (Next.js, TypeScript, Supabase)

May 2023 — Jul 2023

- Built the frontend of a niche student marketplace using Next.js and TypeScript, with Supabase for data persistence, collaborating with teammates on authentication and comment features.

Education

De La Salle University, BS in Computer Science, Software Technology

2021 — 2025

iACADEMY, SHS Software Development Strand, Graduated with High Honors

2019 — 2021

Skills

Languages & Frameworks: HTML/CSS, TypeScript, JavaScript, React, React Native, Next.js, Tailwind, SASS

Databases & Other Tools: PostgreSQL, Supabase, MySQL, Prisma, Git, Vercel, REST API, npm

Design Tools: Figma, Framer, Adobe Photoshop

Core Concepts: UI/UX Design, Design Systems, User Flows, Wireframing, Usability Testing, Agile/Scrum, Project Management, Responsive Design, Web Accessibility, Component-based Architecture
